---

---

---

---

---

---

## Why Use Data For Decision Making?

- Decisions are more likely to be effective and efficient when they are based on data.
- The quality of decision making depends most on the first step (defining the problem to be solved).
  - Define problems with precision and clarity

---

---

---

---

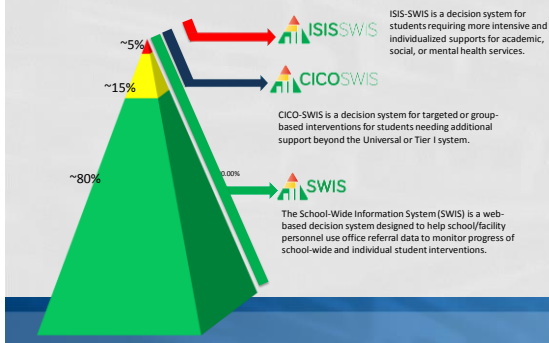

---

---

---

---

## A Continuum of Decision Making

---

---

---

---

---

---

---

---

## Why Use Data For Decision Making?

- Data help us ask the right questions...they do not provide the answers. Use data to:
  - Identify problems
  - Refine problems
  - Define the questions that lead to solutions
- Data help place the “problem” in the **context** rather than in the students.

---

---

---

---

---

---

---

---

---

---

---

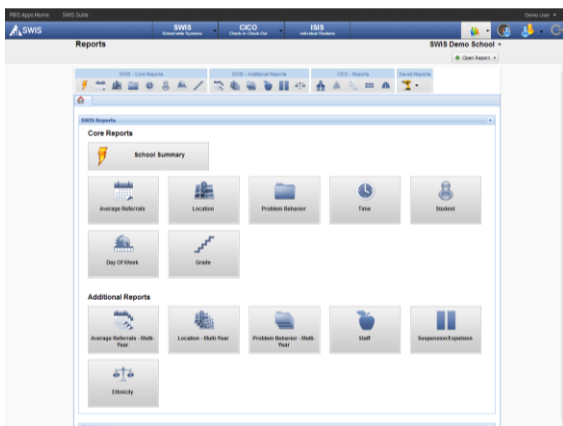

---

---

---

---

---

---

---

---

---

---

---

---

---

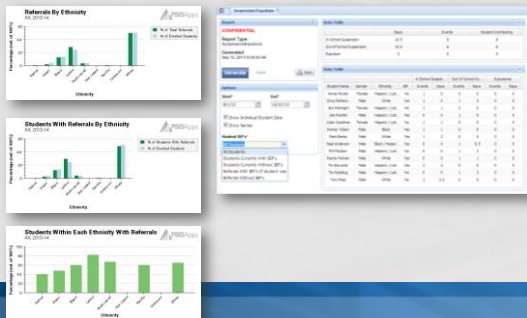

## Core SWIS Reports

## Additional SWIS Reports

## Additional SWIS Reports (cont.)

## Using SWIS Data for Decision Making

- Universal Screening Tool
  - Proportion of students with
    - 0-1 Office Discipline Referrals (ODRs)
    - 2-5 ODRs
    - 6+ ODRs
- Progress Monitoring Tool
- Compare data across time
  - Prevent previous problem patterns

---

---

---

---

---

---

---

---

## Using the Referrals by Student as a Universal Screening Tool

---

## Research Study on Early Intervention

## Team Meeting Expectations

- Team foundations (roles, schedule, agenda)
- Define problems with precision
- Define the goal before the solution
- Build functional solutions
- Transform solutions into action plans
- Measure fidelity and impact (repeatedly)
- Adapt solutions over time to fit new data

TIPS Meeting Minutes form for:

## Team Meeting Expectations

## Identifying Problems/Issues

- **What data to monitor**
  - ODR per day per month
  - OSS, ISS, Attendance, Teacher report
  - Team Checklist/ SET (Are we doing what we planned to do?)
- **What question to answer**
  - Do we have a problem?
- **What questions to ask of Level, Trend, Peaks**
  - How do our data compare with last year?
  - How do our data compare with national/regional norms?
  - How do our data compare with our preferred/expected status?
- **If a problem is identified, then ask**
  - What are the data we need to make a good decision?

## Using Data to Refine Problem Statements

- The statement of a problem is important for team-based problem solving.
  - Everyone must be working on the same problem with the same assumptions.
- Problems often are framed in a "Primary" form. That form creates concern, but is not useful for problem-solving.
  - Frame primary problems based on initial review of data
  - Use more detailed review of data to build "Solvable Problem Statements."

## Precise Problem Statements

- What are the data we need for a decision?
- Precise problem statements include information about the following questions:
  - **What** is the problem behavior?
  - **How** often is the problem happening?
  - **Where** is the problem happening?
  - **Who** is engaged in the behavior?
  - **When** is the problem most likely to occur?
  - **Why** is the problem sustaining?

---

---

---

---

---

---

---

---

## Using SWIS Data to Solve Problems

---

---

---

---

## Using SWIS Data to Solve Problems

---

---

---

---

---

---

---

---

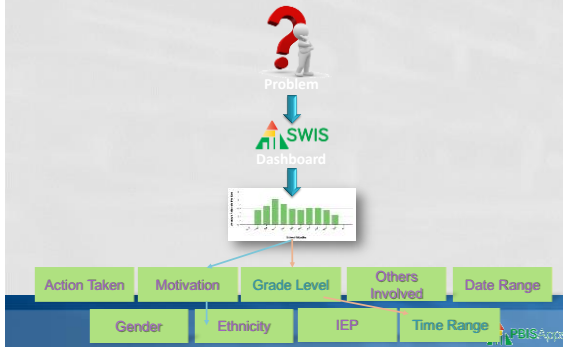

---

---

## The Problem-Solving “Mantra”

- Do we have a problem? (identify)
- What is the precise nature of our problem? (define, clarify, confirm/disconfirm inferences)
- Why does the problem exist, and what can we do about it? (hypothesis & solution)
- What are the actual elements of our plan? (Action Plan)

---

---

---

---

---

---

---

---

---

---

## The Problem-Solving “Mantra”

- Is our plan being implemented, and is it working?  
(evaluate & revise plan)
- What is the goal?  
(What will it look like when there is not a problem?)

---

## CICO-SWIS

---

---

---

---

---

---

---

---

## Check In Check Out: A Targeted Intervention

Thanks to:  
Rob Horner, George Sugai, Anne Todd,  
Celeste Rossetto Dickey, Cindy Anderson, Terry Scott  
University of Oregon and University of Connecticut

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

## Goals

- Define the logic and core features of Targeted Interventions, and the specifics of the Check-in/Check-out (CICO) approach.
- Provide empirical evidence supporting CICO, and practical examples from local schools.
- Self-assess if CICO is appropriate for your school/district
- Build action plan for CICO implementation

---

---

---

---

---

---

---

---

## Research on CICO

- More effective with students with attention-maintained problem behavior (March & Horner, 2002; McIntosh, et., al., 2009, Campbell & Anderson, 2008)
- Effective across behavioral functions (Hawken, O'Neill, & MacLeod, 2011)
- Students who do not respond to CICO benefit from function-based, individualized interventions (Fairbanks, et., al., 2007, March & Horner, 2002; Macleod, Hawken, & O'Neill, 2010)

---

---

---

---

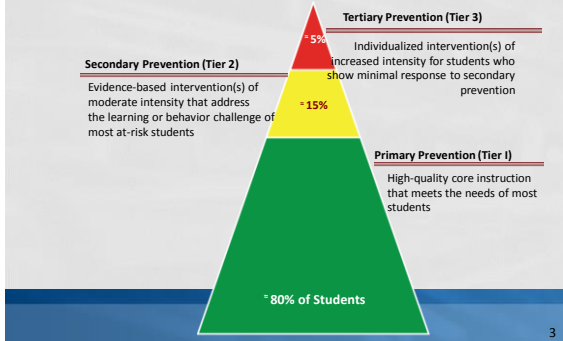

---

---

---

---

## Conceptualizing the Framework

---

---

---

---

---

---

---

---

## Major Features of Targeted Interventions

- Intervention is continuously available
- Rapid access to intervention (72 hours)
- Very low effort by teachers
- Consistent with school-wide expectations
- Implemented by all staff/faculty in a school
- Home/school linkage
- Flexible intervention based on assessment
  - Functional Assessment
- Adequate resources (administration, team)
  - weekly meeting, plus 10 hours a week for coordination
- Student chooses to participate
- Continuous monitoring for decision-making

---

---

---

---

---

---

---

---

## Core features of CICO / Behavior Education Program (BEP)

- **Behavioral Priming/ Behavioral Momentum**
  - Start school off positively
  - Start each class off positively
- **Student recruitment of contingent adult attention**
  - Approach adults (teachers/ family)
- **Predictability**
- **Self-management**
- **Data-based decision-making**
- **Efficiency**

---

---

---

---

---

---

---

---

---

---

---

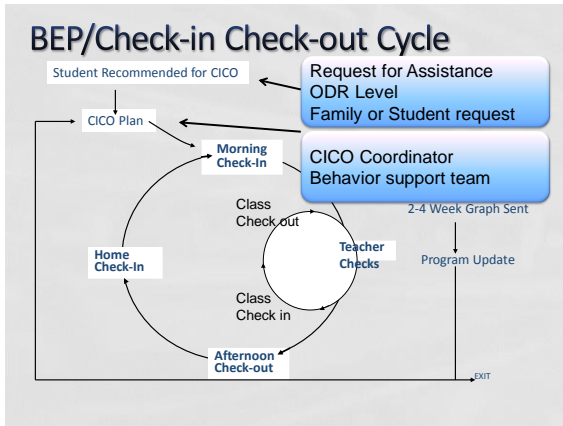

---

---

---

---

---

---

---

---

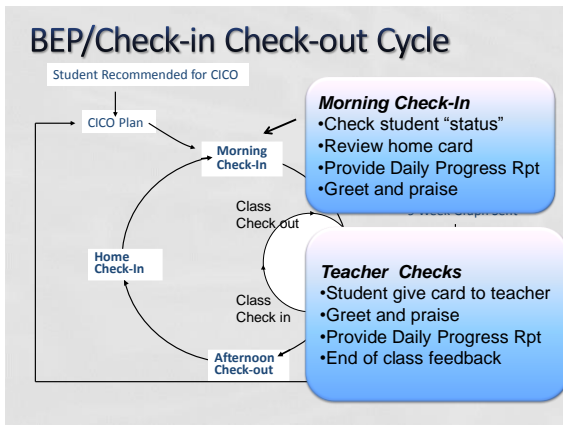

---

---

---

---

---

---

---

---

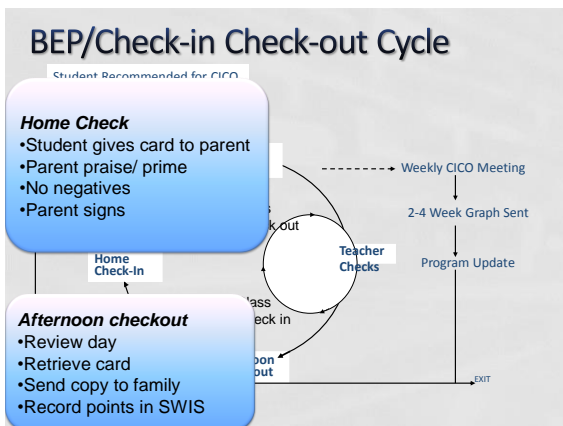

---

---

---

---

---

## BEP/Check-in Check-out Cycle

Student Recommended for CICO

### Team Meeting

- Review student progress
- Adjust support plan if no improvement within 2 weeks
- Build self-management steps when appropriate
- Exit when appropriate
- Report to School-wide Team, Administration, Whole Faculty

---

---

---

---

---

---

---

---

## Brian Bender

Use the ISIS-SWIS Student File Set-Up Checklist to prepare a student's file for set-up in ISIS-SWIS.

**ISIS-SWIS Student File Set-Up Checklist** Date: April 2012

**I. Student File Information**

Student: **Brian Bender**

Coordinator: **Myra Rose**

**II. Team Member Information**

Name	Team Role	Access Level (Full, data entry, read-only, no access)	Email
Brian Bender	CEO/Advisor	Full	bender@bennerschool.org
Myra Rose	Parent	No Access	pbender@bennerschool.org
Kathy McDaniel	Teacher	Read Only	mcandk@bennerschool.org
Stuart Rose	Teacher	No Access	stuart@bennerschool.org
Frank Stevenson	Teacher	No Access	stevenson@bennerschool.org

## Who uses ISIS-SWIS?

### Individual Student Support Teams

Individual Student Team	Coordinator of Team
<ol style="list-style-type: none"> <li>1. Assessment and support planning</li> <li>2. Implement and monitor support plan</li> <li>3. Team decision making and communication</li> <li>4. Target areas in need of staff training or coaching</li> <li>5. Student data collection and evaluation</li> <li>6. Fidelity/team data collection and evaluation</li> </ol>	<ol style="list-style-type: none"> <li>1. Establish team roles</li> <li>2. Liaison between School-wide Tier 3 Support Team, Individual Student Teams, and families</li> <li>3. Manage decisions related to individualized plan and changes to plan</li> <li>4. Monitor individual student progress</li> <li>5. Monitor fidelity of plan implementation</li> </ol>

## Creating Student Files Roles & Responsibilities

The coordinator of an individual student team is responsible to set up student files in ISIS-SWIS.

*A coordinator attends the full Swift at ISIS-SWIS training and is set up in SAMI as an ISIS-SWIS Coordinator.*

Role	Description	ISIS-SWIS Access
<b>ISIS-SWIS Facilitator</b>	A certified ISIS-SWIS Facilitator is someone within the region/district who can provide technical assistance for coordinating the implementation and evaluation of individual support.	<b>SAMI Access</b> <ul style="list-style-type: none"> <li>Account and User Management</li> <li>Coordinator Management</li> <li>Coordinator Access to all Student Files</li> </ul>
<b>ISIS-SWIS Coordinator(s)</b>	An ISIS-SWIS Coordinator is someone at the school who manages individualized student support teams. This person completes the Swift at ISIS-SWIS training with the ISIS-SWIS Facilitator.	<b>Coordinator Access</b> <ul style="list-style-type: none"> <li>Transfer assigned student file to new coordinator</li> <li>Add/Edit Assigned Student File(s)</li> <li>Person Management</li> <li>Add/Edit Measures</li> <li>Add/Edit Team Members</li> <li>Add/Edit Documents</li> <li>Data Entry</li> <li>Reports</li> </ul>
<b>School-wide Read Only User</b>	A School-wide Read Only User is an administrator, coordinator, coach or evaluator who needs access to both school-wide and individual student reports.	<b>Read-Only Access</b> <ul style="list-style-type: none"> <li>School-wide Reports</li> <li>Read-Only Access to all Student Files</li> </ul>
<b>ISIS-SWIS User(s)</b>	An ISIS-SWIS User is an individual student support team member who needs access to one or more student files (documents, data, team member information). The team member may enter individualized support data and/or generate reports for one or more students in ISIS-SWIS. Access level should be identified based on tasks assigned.  During initial implementation of ISIS-SWIS all users should attend the Swift at ISIS-SWIS training with the facilitator. After implementation users may be trained by coordinators.	<b>Full Access</b> <ul style="list-style-type: none"> <li>Assigned Student File(s)</li> <li>Add/Edit Documents</li> <li>Data Entry</li> <li>Reports</li> </ul> <b>Read-Only Access</b> <ul style="list-style-type: none"> <li>Assigned Student File(s)</li> <li>Documents (View)</li> <li>Team Members (View)</li> <li>Reports</li> </ul>
<b>Other Team Members</b>	An ISIS-SWIS Team Member is someone identified as a participating member of a student's support team. A team member who does not have an additional role of coordinator or user will not have access to ISIS-SWIS.	No Access

---

---

---

## Fidelity of Implementation Measures

How well did we do what we said we would do?

Fidelity measures the degree to which the intervention was implemented as defined/expected.

*Example: Staff will strive for 80% fidelity of implementation as measured weekly (or bi-weekly) on scale of 0-5.*

Make it easy for staff to record!

- 👤 Fidelity Check Board: X on number line in staff room
- 👤 Fist of five during team meeting
- 👤 Fidelity check basket
- 👤 Direct Observation (requires trusting & supportive staff climate)

---

---

---

---

---

---

## Introducing Fidelity of Implementation

Fidelity data is an opportunity to discuss the student's support plan, not a tool to pick on staff!

Questions to ask of fidelity data:

1. Is the plan being implemented?
2. Is the plan a good contextual fit for the environment?
3. Is additional training or coaching needed?
4. Are there sufficient resources allocated to implement the plan?
5. Has something changed (e.g. staff, schedule, student behaviors)?
6. Are there barriers that are hindering the implementation of the plan?

## Outcome Measures

Is the plan having an effect on the student's behavior?

Student Outcome measures or tracks what effect the implementation of the plan is having on the student's academic and/or social behavior.

What do we want to track and how?

- Problem Behavior (e.g. duration, frequency, intensity)
- Replacement/Desired Behavior (e.g. duration, frequency, points earned)
- Academic behavior (e.g. correct words per minute, test scores, correct sounds produced, level of participation)
- Skill acquisition (e.g. steps of hand-washing completed, vocabulary words)

 Student: \_\_\_\_\_ Date: \_\_\_\_\_

**ISIS-SIWIS Student File Set-Up Checklist**

Use the ISIS-SIWIS Student File Set-Up Checklist to prepare a student's file for set up in ISIS-SIWIS.

### Measure Report

From: 9/7/12 To: Today

Primary Measure: Select Primary Measure...  
Comparative Measure: None

Options:  
☒ Student Name  
☒ Goal Lines  
☒ Support Plan Changes  
☒ Notes

Generate Report

No Report Generated

About Measure Report  
Line graph of "Primary Measure" and (if selected) any "Comparative Measure" with data for a student plotted by day from the data requested to either the current date or any earlier date. The data are also provided in a table of numbers.

#### Student File for Carly Johnson

##### Measures

Name	Type	First Day with Data	Last Day with Data
Rate of Disruption	Outcome	Apr 23, 2012	Jun 1, 2012
Room 12 On-Task Points	Outcome	Apr 26, 2012	Jun 1, 2012
Staff Fidelity	Fidelity	Apr 27, 2012	Jun 1, 2012

## Student Measure Report

**From\***  
  
**To**

**Primary Measure\***

**Comparative Measure**

**Options**  
☒ Student Name  
☒ Goal Lines  
☒ Support Plan Changes  
☒ Notes

From: Enter the date range for the report.  
Click on the calendar icon to open the calendar navigation feature.

Primary Measure: Choose the measure you want to report on.

(Optional) Comparative Measure: Choose a measure that you want to compare to the primary measure.

Options allow you to show or hide specific information on the report for confidentiality purposes or to reduce visual distractions on the graph.

[Generate Report](#) Click on Generate Report to view the requested data.
